# Leadership Styles -

## *And when to use it*

SCWK BITES

### Most people ask:

"What's the best leadership style?"
The real answer?
There isn't one.
Great leaders don't stick to a single style...
They adapt based on the situation.
Because what works today, might fail tomorrow.

Need direction? → Be Visionary
Need ideas? → Be Democratic
Team struggling? → Be Servant
Building future leaders? → Be Coaching
Strong team? → Be Delegative
But here's where it gets interesting

Every strength, when overused... becomes a weakness.
Too much control → kills trust
Too much freedom → creates chaos
Too much consensus → slows decisions
Real leadership is not about style.
It's about timing, awareness, and balance.
That's the difference between
a manager... and a leader.
